

Safety Bulletin No.	2020 04	Date Issued	17 th February, 2020
Subject	Hard waste bin trial – DIA East End Waste Station		
Area of Concern	Overfilling bin		
Issued By	<i>Steve Caldwell</i> (WHS – 0402 782 375)		

Introduction

As per our previous Safety Bulletin 18, issued in Dec 2019, I would like to report that the hard waste bin trial has been a success and airport users are using the bin for its intended purpose. We will continue to provide this bin for airport users for the foreseeable future.

However, all users are required to report when the bin is nearly full to ensure the bin isn't overfilled. When the bin is overfilled, the lifting mechanism cannot operate during the bin collection process.

When bin is overfilled it cannot be emptied – report when bin is nearly full

Action

Please report when hard waste bin is nearly full by contacting the:

- ADM (0401 005 977) or WHS (0402 782 375)

Thank you for your cooperation in this matter.

THINK SAFELY, ACT SAFELY
