

Safety Bulletin No.	2020 13	Date Issued	22 December 2020
Subject	Disposal of face masks		
Area of Concern	Clean - up hazard		
Issued By	<i>Steve Caldwell</i> (WHS – 0402 782 375)		

Introduction

With the common use of masks by pax coming from interstate there is evidence of incorrect disposal around the terminal. Clearly this creates another hazard for us, and people are reminded not to pick up disused masks without using gloves.

Action

- When picking up masks that have been incorrectly disposed of please wear gloves.
- Gloves are available at the Airport Management Centre (DIA) & Terminal Control Centres (DIA & ASA)

- When removing gloves please remove & dispose of as below:

Hold one of your wrists so that your thumb points up. Pinch that glove and lift at the wrist, then roll it down until the glove is completely off in a ball in the palm of the other hand. Then, slide a finger down and inside the glove on the other hand and pull it off until it is balled around the first glove. Dispose of the gloves.

THINK SAFELY, ACT SAFELY
